LinkedIn · github.com/TSiez

Philippines · remote, open worldwide

A tech-savvy **Virtual Assistant with a Computer Science background** — supporting founders and small teams with admin, social media, content design, and data research. I work fluently with AI tools, communicate clearly async, and pick up new platforms fast: reliable support without the hand-holding.

■ SKILLS

Admin & Ops

Microsoft 365, Excel, inbox & calendar management, scheduling, file & data organization, research, async communication

Content & Design

Canva, CapCut, Figma, Affinity, social media content, short-form video, light graphic design

Data & Tech

Looker Studio, Python, SPSS, web scraping, HTML/CSS, AI prompting (Claude, Gemini)

Languages

English · Filipino · Cebuano

■ EDUCATION

BS in Computer Science 2026

Silliman University

- Visual computing & AI integration

NLP & Computer Vision Cert.

Workshop

National University, Manila

- NER with BERT, computer vision; model dev with Roboflow on Google Colab

■ SELECTED PROJECTS

Concept Archive

AI design-concept generator

Trend Finder

Live news aggregator + AI idea extraction

Morning Briefing

Automated daily email dispatch

Design Portfolio

Editorial brand site

■ EXPERIENCE

Virtual Assistant & Web Projects

2023 – Present

Freelance · Independent

- Provide remote admin, scheduling, research and data organization support, working async with AI tools to move quickly and reliably.
- Create social media content and short-form video, and design lightweight brand and marketing pages end to end.
- Built and shipped working web apps — an AI concept generator, a live trend finder, and editorial brand sites — each with its own visual identity.
- Set up data pipelines and automations: web scraping, a cron-driven daily email briefing, and FFmpeg-driven media generation.

■ STRENGTHS

Reliable & low-maintenance

Clear async updates, fast turnaround, and follow-through without hand-holding.

Fast learner

Comfortable picking up new platforms and tools quickly, with a technical foundation to back it up.

AI-fluent

Uses AI tools daily to research, draft, summarize, and automate repetitive work.
